

Congratulations!

Bobby VonHerbulis
Owner/President

IQ NAIMA
Insulation
Quality Award

McKee Construction Co. of Central Florida

Winner-2004 I.Q. Award

The award honors metal building contractors who are committed to Insulation Quality, best practices and achieving the highest standards of energy efficiency through the use of NAIMA 202.96® insulation.

“We are not interested in cutting corners. Our commitment is to building a finished product that will last, while providing long-term energy efficiency and savings that enable our customers to grow.”

— Bobby VonHerbulis

Stephen C. Esler
Vice President

Does I.Q. matter when creating success in the metal building industry? When the I.Q. stands for Insulation Quality, the answer is a definite “yes.” That’s a fact well understood by Bobby VonHerbulis and Steve Esler of McKee Construction. In business for more than 31 years, McKee Construction uses NAIMA 202.96® fiber glass metal building insulation exclusively.

For quality, energy efficiency, code compliance, comfort, safety and long-term value, there’s no better metal building insulation than one that carries the NAIMA 202.96® mark of distinction. When it comes to achieving the highest levels of quality in metal building, there’s no smarter builder than McKee Construction.
